

Octopus One

VWS International specialises in weighing, labelling and automation. We cover the sales, installation, and service of the systems they provide. , including weighing and labelling systems, labelling systems, weighing equipment, inspection systems, and weighing. Where required, we implement specific customised solutions. Our team of professional and motivated employees together have more than 150 years of experience in weighing and labelling. It is of no surprise that companies from small to large have already placed their trust in us and belong to our steadily growing group of satisfied customers. There are already plenty of systems operational in the Netherlands, Belgium, North and South America, Australia, New Zealand and UK, among others.

Description

The **Octopus One**, developed and built entirely in-house, is the new standard in manual weighing and labelling. Thanks to the innovative software and the application of the most advanced weighing and printing technology, the systems fully meet the requirements of today and for the future.
